PRODUCT UPDATES

• SOC2 Type 1 Compliance Certification:

Aporeto is the only SaaS solution in the Zero Trust Cloud Security space to achieve SOC2 Type 1 certification. Learn more in our recent [press release](#).

• Identity Federation for Access to AWS Cloud Resources:

This is an extension to the Aporeto Cloud PAM product. Aporeto now gives security teams the ability to:

- Do identity federation with any SAML or OAuth provider for access to the AWS CLI.
- Broker IAM roles to users based on claims from an identity provider
- Broker IAM roles to workloads based on workload identity. Provide developers the freedom to run their containers or VMs on any cloud while controlling least privileged access to your most important AWS cloud resources such as RDS or S3.

Microservices, The Machine Tools of the Digital Revolution
Forbes - October 22, 2019

Microservices and service meshes are important cloud technology elements, learn how they work and why they are critical to business success.

PRESS COVERAGE

Aporeto Achieves SOC2 Type 1 Compliance Certification

Aporeto is proud to announce that we have achieved SOC2 Type 1 compliance certification for our SaaS platform. The AICPA audit confirms Aporeto is the only Zero Trust SaaS security enforcement platform to have achieved this certification. Aporeto received certification in the Security and Availability practice.
